Project Proposal

Please provide the following information when submitting a request. Upon receipt of your draft Project Proposal, we may contact you to discuss the objectives and Analysis Plan.

For any section that does not apply to your request or study type enter not applicable or NA.

SECTION 1: CONTACT INFORMATION	
Date of Request	
Requester Name	
Email	
Phone	
Institution	
Therapeutic Area	
Additional Requesters	<i>If your request is on behalf of another individual please add their name and affiliation here</i>

SECTION 2: STUDY OVERVIEW	
Study Title	
Scientific Rationale	<i>Provide a brief summary of the overall purpose of this proposed study and any background information that led to this proposal;</i>
Hypothesis	<i>Provide a description of the hypothesis that you will be testing in this study;</i>
Study Population	<i>Provide a general description of the subjects to be studied (e.g. number of subjects, subject demographics such as age, sex, and other key characteristics, and other key eligibility criteria (inclusion and exclusion criteria) and any subgroups of interest or for comparison). The information</i>

National Echo Database Australia

Project Proposal

	<i>provided should justify selection of subjects and provide assurance that an appropriate number of eligible subjects can be included: Target subjects, Number of sites, Estimated length of study, Estimated Study Start Date, Estimated Study Completion Date (Analysis Complete);</i>
Study Design & Methodology	<i>Describe the general study design, study groups/arms, data elements of interest, primary and important secondary outcome variables, time points for data and general approach to analysis</i>
Study Endpoints	<i>Describe the variables that will be used in the primary analysis and any important secondary analyses, statistical approaches that will be used to analyze them, and conclusions that will be drawn given one or more of the possible outcomes</i>
Statistical Plan	<i>Provide the target sample size for each group of study subjects. Justify the total sample size on the basis of statistical power to test the primary hypothesis (and important secondary hypotheses, if relevant) using the stated primary and/or secondary outcome variables</i>
Target Audience	<i>Abstract, manuscript, oral presentation, etc. Please specify relevant dates, venue, target journal etc where applicable. Estimated publication date.</i>

SECTION 3: REFERENCES AND SUPPORT REQUEST DETAIL	
References	<i>Include references to any existing published studies and any other background information you believe is relevant to the review of this proposal</i>
Funding	<i>If you are requesting NEDA analysis, please complete the funds available to contribute; Estimated total budget; Any other funding for this project (eg. in kind support, grants, etc)?</i>
Project Outcomes	<i>Project outcome parameters, time frame and milestones</i>
Other Relevant Information	

Questions and completed proposals can be directed to Professor David Playford (dplayford@neda.net.au) or Associate Professor Geoff Strange (gstrange@neda.net.au)
